Master Locksmith

ML20 Dealer & Installer

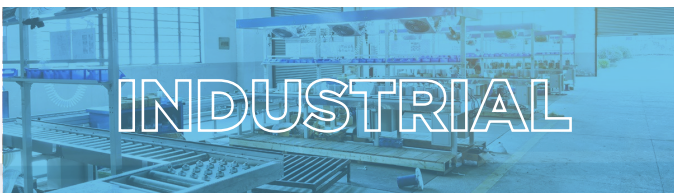

The Master Locksmiths Association of Australasia Ltd (MLAA) is recognised and respected as the peak organisation for locksmithing professionals in Australia and New Zealand. Its 600+ business member network provides a vast array of locksmithing services for commercial & residential clients.

ML20 is a mechanical restricted keying system. ML20 offers protection via design registration until 2030 in both Australia and New Zealand. Supplied exclusively by authorised MLAA Members.

ML20 is a versatile Multi-Profile Restricted Keying System.

ML20 offers 4x anti-pick, high-security keyways, making it suitable for small restricted keying systems right up to very complex multi-profile systems.

All 4x keyways are available now. This means you will never need to wait for the manufacturing of the next keyway to expand your keying system.

This also means it is much easier to design a very complex or large system by having all available keyways from the start.

There is an ML20 component available to suit the majority of locks in Australia and New Zealand. This means in most cases there is no need to change the existing door hardware.
